DETAILED ACTION

Election/Restrictions

1. Claims 16-34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 11/23/05.

Specification

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "116" and "216" have both been used to designate cam portion (see page 17 line 19). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3724

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 10-11, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Garcia et al. (5,701,680).

Garcia et al. discloses the invention including:

- Claim 1; a scribe member 124, a tile engagement member 36, an extension member 122 and locking member 138.
- Claims 2 and 3; extension member is both pivotally and slideably movable relative the tile engagement member (see Fig. 8).
- Claims 4 and 11; a friction connection 130.
- Claims 5 and 14; cam surfaces (the surface interacting with the bolt 38).
- Claim 6; the locking member relative to the tile engagement member is pivotally movable with the extension member (see Fig. 8).
- Claim 10; the scribe member is pivotally connected to the extension member (see Fig. 8).
- Claim 15; a single monolithic member having a straight scribe edge (see Fig. 1).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

6. Claims 7-9, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garcia et al. (5,701,680) in view of Ashworth (5,012,586).

Garcia et al. discloses the invention substantially as claimed except for actuation portions and a resilient portion. However, Ashworth teaches the use of actuation portions (40, 42, 102 and 110) and a resilient portion 90 for the purpose of quickly locking the device. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the locking member of Garcia et al. by providing the actuation portions and the resilient portion as though by Ashworth in order to a device that quickly locks the tool.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moore, Lowe and Hopla are cited to show related device.
